**Subject: Senior Data Engineer: ZMS Central Analytics Engineering  
- Sourabh Muchhal (Snowflake Certified Professional)**

Dear Hiring Team,

I'm excited to apply for the Senior Analytics Engineer role at Zalando. As a **Snowflake Certified Professional** with over 11+ years of deep experience building modern data platforms, scalable data models, delivering high-impact data products, and driving data quality across organizations, I'm confident I can directly contribute to the mission of creating a single source of truth for Zalando Marketing Services (ZMS).

I bring a strong command of dbt, SQL, Snowflake, Matillion, Fivetran, and Python, combined with hands-on experience designing and maintaining modular data transformations that empower stakeholders and analysts to extract insights independently. I've led end-to-end development of data products that supported marketing performance, partner analytics, and campaign optimization—exactly the kind of outcomes your team is driving at scale.

I've also designed ETL/ELT workflows, deployed CI/CD pipelines, and worked cross-functionally with data scientists, BI teams, and domain experts to launch data products that directly support operational and clinical decision-making.

In my current role, I've implemented lakehouse architecture using Databricks, built reusable data marts for analytics teams, and ensured rigorous testing and documentation to uphold trust in our datasets. I've collaborated directly with product managers and business leads, turning KPIs into robust models that serve as the backbone for reporting and strategy.

What sets me apart is my ability to think like a product owner: I don't just deliver datasets, I deliver solutions. I understand the long-term value of scalable, governed data infrastructure, and I take ownership of data products that support strategic decision-making across departments. Zalando's vision to shape Europe's leading marketing insights platform is bold, and I'm ready to contribute. I thrive in fast-paced, data-forward environments, and I'm eager to join a team that values technical excellence, ownership, and business impact.

Thank you for considering my application. I look forward to the opportunity to bring my expertise and energy to Zalando.

Best regards,  
Sourabh Muchhal
